

At the Fresh Factory™, we've built a platform to accelerate the **growth of fresh, plant-based, and clean-label** food and beverage brands. We are vertically integrated **from the farm to the shelf** and offer services above and beyond traditional manufacturing, becoming a **trusted growth partner** for leading brands. In short, we seek to be a partner, not a vendor.

OUR VALUES

Safety + Quality: It all starts with safety and quality.

Innovation: We make original and inspiring food.

Operational Excellence: We want tomorrow to be better than today.

Integrity: We do what we say.

Sustainability: It's about something bigger.

 Vertical Form Fill Seal Equipment
 1# - 18#
 Hot Fill / Cold Fill / HPP
 Low- to high-viscosity products

OUR SERVICES

Innovation: We launch dozens of innovative products each year. When you're ready to begin production, we can perform full-production trial runs to ensure the product quality is the same for large runs as it was in the kitchen.

Real Food: We handle actual produce items and turn them into delicious plant-based foods. We use novel and innovative processing techniques to allow you to make real food with no artificial colors or preservatives. Whether your brand is keto, paleo, Whole30, organic, or the hottest trend, we will support you to get you to market where you will make an impact.

Fulfillment: Our team can provide assembly, case-packing, and pick-pack-ship services to help you fulfill orders, whether for traditional retail distribution or alternative channels. We provide on-site and off-site storage for ingredients and finished goods, whether dry or refrigerated. Whether you have one DC or multiple, our warehouse team can pick orders to ensure that the right product gets to the right location. Various distributors pick up from our facility, making us a convenient consolidation center for emerging brands.

Finance: We can extend terms on receivables typically by setting up lockbox arrangements on purchase orders. We can also introduce companies, depending on their needs, to various financing partners to help with working capital. We are in constant collaboration with accelerators, incubators, flavor houses, consultants, and investors in the food and beverage space and are happy to make introductions within our network on an as-needed basis. Each year we choose 1-2 companies as equity partners. Equity partnership often involves an investment of services, equipment, and other resources in exchange for equity.
